### **Health & Safety Blue Book now available in a new annual format**

Construction Industry Publications has produced its popular Construction Health & Safety manual (the 'Blue Book') in a new annual format.

This single volume version contains all the same information as the popular two volume loose leaf volume, but removes the need to up-date the manual as it is replaced each year with a new version. Therefore you will always know that you have the up-to-date information at your fingertips.

Just like the CD-Rom and loose leaf version the new **annual** manual provides simple, informative guidance on all the health and safety issues and the steps that must be taken both to ensure compliance with legal duty and, through the application of good practice, to ensure health and safety is adequately protected.

The content, strictly monitored by an editorial panel of H&S practitioners, is endorsed by the Health and Safety Executive and will be up-dated **annually** to ensure both accuracy and topicality.

It is written by Health and Safety Managers and Advisors who represent a wide cross section of the UK's leading construction companies.

The main aim of the manual is to provide all those involved in construction with a useful and pragmatic tool to help them comply with their legal duties and to improve the way health and safety issues are managed.

Industry professionals have endorsed the manual. Bob Sayers Health and Safety Director at Redrow Plc said: "For me and my team the Manual is an essential tool that ensures we are always up to date with all aspects of construction health and safety."

The price of the manual is £230.
