New Risk Guide & Sample Forms

The Construction Industry UK workforce is often involved in activities that carry with them a high degree of risk – causing accidents that can be serious or even fatal. Some construction activities also have the potential to harm the health of people who may be affected by the activity. In response to this Construction Industry Publications (CIP) has produced a new 'Risk Guide & sample forms', this is an updated version of the original CIP Risk Guide and Sample Book combined in to one.

This Guide provides:

- An introduction to what Risk Assessments are and why we do them
- Relevant legislation and definitions
- Details of how to carry out a Risk Assessment
- Over 50 sample Risk Assessment forms

Tony Wheel, Health & Safety Consultant for CIP added "Current legislation requires employers to carry out risk assessments for their activities so as to give proper consideration of risks and how to manage them. However, carrying out a competent risk assessment is an important step in protecting your workers and your business, as well as complying with the law. This new publication which contains over 50 sample Risk Assessment forms will help you do this"

The Risk Guide is available to order from CIP www.cip-books.com. The Guide costs £14.99 each, Tel: 0870 078 4400 Email: sales@cip-books.com

Notes to editors:

1. The Construction Confederation is the main representative organisation for building and civil engineering contractors within the UK construction industry, one of the largest and most diverse sectors within the British economy.
